Hands on Laparoscopic Hernia Repair (TAPP) Course

An intensive one-day course on the technique of laparoscopic trans-abdominal inguinal hernia repair (TAPP) with HANDS ON SURGERY. The course incorporates lectures on the equipments, technique and outcomes as well as the evidence in favour of the laparoscopic technique and the latest guidance from the National Institute for Health and Clinical Excellence UK. The course will provide the opportunity for delegates to do TAPP under supervision.

Course Director & Instructor:

MR Ahmed Halawa MBBCh; MSc; FRCS; MD, FRCS
(Gen) Consultant General Surgeon; Sheffield Teaching
Hospitals, UK.

Faculty: Consultants with the appropriate experience in the technique and also in training.

Cost and Date: to be arranged.

Delegates: Final years Registrars and Consultants with basic laparoscopic experience (4 surgeons).

Objectives: Hands on course training surgeons with laparoscopic experience TAPP through assisting and operating under supervision (4 patients with bilateral hernias, one side is done by the trainer as demonstration assisted by the delegate. The other side will be done by the delegate supervised by the trainer).

Also teaching scrub nurses the steps of TAPP, anatomy and the instruments used. The delegate will spend more time operating rather than listening to lectures and watching videos.

PROVISIONAL PROGRAMME

08.30 Theatre (Hands on)
